EVERLIFE.AI

White Paper

EverLifeAI Pte. Ltd.

**Incorporated in Singapore
Company Registration No. 201821579E
Last updated: Mar 27, 2021**

<u>IMPORTANT NOTICE</u>

PLEASE READ THIS SECTION AND THE FOLLOWING SECTIONS ENTITLED "DISCLAIMER OF LIABILITY", "NO REPRESENTATIONS AND WARRANTIES", "REPRESENTATIONS AND WARRANTIES BY YOU", "CAUTIONARY NOTE ON FORWARD-LOOKING STATEMENTS", "MARKET AND INDUSTRY INFORMATION AND NO CONSENT OF OTHER PERSONS", "NO ADVICE", "NO FURTHER INFORMATION OR UPDATE", "RESTRICTIONS ON DISTRIBUTION AND DISSEMINATION", "NO OFFER OF SECURITIES OR REGISTRATION" AND "RISKS AND UNCERTAINTIES" CAREFULLY.

IF YOU ARE IN ANY DOUBT AS TO THE ACTION YOU SHOULD TAKE, YOU SHOULD CONSULT YOUR LEGAL, FINANCIAL, TAX OR OTHER PROFESSIONAL ADVISOR(S).

EVER tokens are not intended to constitute securities in any jurisdiction. This whitepaper does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities or a solicitation for investment in securities in any jurisdiction. This whitepaper does not constitute or form part of any opinion on any advice to sell, or any solicitation of any offer by the distributor/vendor of the EVER tokens to purchase any EVER tokens nor shall it or any part of it nor the fact of its presentation form the basis of, or be relied upon in connection with, any contract or investment decision. No person is bound to enter into any contract or binding legal commitment in relation to the sale and purchase of the EVER tokens.

Disclaimer of liability

To the maximum extent permitted by the applicable laws, regulations and rules, EverLife.AI shall not be liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this whitepaper or any part thereof by you.

No representations and warranties

EverLife.AI does not make or purport to make, and hereby disclaims, any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking in relation to the truth, accuracy and completeness of any of the information set out in this whitepaper.

Representations and warranties by you

By accessing and/or accepting possession of any information in this whitepaper or such part thereof (as the case may be), you represent and warrant to EverLife.AI as follows:

1. you agree and acknowledge that the EVER tokens do not constitute securities in any form in any jurisdiction;

2. you agree and acknowledge that this whitepaper does not constitute a prospectus or offer document of any sort, and is not intended to constitute an offer of securities in any jurisdiction or a solicitation for investment in securities and you are not bound to enter into any contract or binding legal commitment and no cryptocurrency or other form of payment is to be accepted on the basis of this whitepaper;

3. you agree and acknowledge that no regulatory authority has examined or approved of the information set out in this Whitepaper, no action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction and the publication, distribution or dissemination of this whitepaper to you does not imply that the applicable laws, regulatory requirements or rules have been complied with;

4. you agree and acknowledge that this Whitepaper, the undertaking and/or the completion of the EverLife.AI Token Sale, or future trading of the EVER tokens on any cryptocurrency exchange, shall not be construed, interpreted or deemed by you as an indication of the merits of the EverLife.AI, the EVER tokens, the EVER Token Sale Offering and the EVER Wallet (each as referred to in this whitepaper);

5. the distribution or dissemination of this Whitepaper, any part thereof or any copy thereof, or acceptance of the same by you, is not prohibited or restricted by the applicable laws, regulations or rules in your jurisdiction, and where any restrictions in relation to possession are applicable, you have observed and complied with all such restrictions at your own expense and without liability to EverLife.AI;

6. you agree and acknowledge that in the case where you wish to purchase any EVER tokens, the EVER tokens are not to be construed, interpreted, classified or treated as:
   - any kind of currency other than cryptocurrency;
   - debentures, stocks or shares issued by any person or entity
   - rights, options or derivatives in respect of such debentures, stocks or shares;
   - rights under a contract for differences or under any other contract the purpose or pretended purpose of which is to secure a profit or avoid a loss;
   - units in a collective investment scheme;
   - units in a business trust;
   - derivatives of units in a business trust; or
   - any other security or class of securities

7. you have a basic degree of understanding of the operation, functionality, usage, storage, transmission mechanisms and other material characteristics of cryptocurrencies, blockchain based software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain technology and smart contract technology;

8. you are fully aware and understand that in the case where you wish to purchase any EVER tokens, there are risks associated with EverLife.AI and their respective business and operations, the EVER tokens, the EverLife.AI Token Sale Offering and the EverLife.AI Wallet (each as referred to in the whitepaper);

9. you agree and acknowledge that EverLife.AI is not liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this Whitepaper or any part thereof by you; and,

10. all of the above representations and warranties are true, complete, accurate and non misleading from the time of your access to and/or acceptance of possession this whitepaper or such part thereof (as the case may be).

Cautionary note on forward-looking statements

All statements contained in this Whitepaper, statements made in press releases or in any place accessible by the public and oral statements that may be made by EverLife.AI constitute "forward looking statements". Some of these statements can be identified by forward-looking terms such as "aim", "target", "anticipate", "believe", "could", "estimate", "expect", "if", "intend", "may", "plan", "possible", "probable", "project", "should", "would", "will" or other similar terms; however, these terms are not the exclusive means of identifying forward-looking statements.

All statements regarding EverLife.AI's financial position, business strategies, plans and prospects and the future prospects of the industry which EverLife.AI is in are forward-looking statements. These forward-looking statements, including but not limited to statements as to EverLife.AI's revenue and profitability, prospects, future plans, other expected industry trends and other matters discussed in this whitepaper regarding EverLife.AI are matters that are not historical facts, but only predictions.

These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual future results, performance or achievements of EverLife.AI to be materially different from any future results, performance or achievements expected, expressed or implied by such forward-looking statements.

Nothing contained in this Whitepaper is or may be relied upon as a promise, representation or undertaking as to the future performance or policies of EverLife.AI. Further, EverLife.AI disclaim any responsibility to update any of those forward- looking statements or publicly announce any revisions to those forward-looking statements to reflect future developments, events or circumstances, even if new information becomes available or other events occur in the future.

No advice

No information in this whitepaper should be considered to be business, legal, financial or tax advice regarding EverLife.AI, the EVER tokens, the EverLife.AI Token Sale Offering and the EverLife.AI Wallet (each as referred to in the Whitepaper). You should consult your own legal, financial, tax or other

professional adviser regarding EverLife.AI and their respective businesses and operations, the EVER tokens, the EverLife.AI Token Sale Offering and the EverLife.AI Wallet (each as referred to in the whitepaper). You should be aware that you may be required to bear the financial risk of any purchase of EVER tokens for an indefinite period of time.

No offer of securities or registration

This whitepaper does not constitute a prospectus or offer document of any sort, and is not intended to constitute an offer of securities or a solicitation for investment in securities in any jurisdiction. No person is bound to enter into any contract or binding legal commitment. No regulatory authority has examined or approved of any of the information set out in this whitepaper. No such action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this Whitepaper does not imply that the applicable laws, regulatory requirements or rules have been complied with.

Restrictions On Distribution And Dissemination

The distribution or dissemination of this Whitepaper or any part thereof may be prohibited or restricted by the laws, regulatory requirements and rules of any jurisdiction. In the case where any restriction applies, you are to inform yourself about, and to observe, any restrictions which are applicable to your possession of this Whitepaper or such part thereof (as the case may be) at your own expense and without liability to EverLife.AI. Persons to whom a copy of this Whitepaper has been distributed or disseminated, provided access to or who otherwise have the Whitepaper in their possession shall not circulate it to any other persons, reproduce or otherwise distribute this Whitepaper or any information contained herein for any purpose whatsoever nor permit or cause the same to occur.

Risks And Uncertainties

Prospective purchasers of EVER tokens (as referred to in this Whitepaper) should carefully consider and evaluate all risks and uncertainties associated with EverLife.AI, the EVER tokens, the EverLife.AI Initial Token Sale (each as referred to in the Whitepaper), all information set out in this Whitepaper and the T&Cs prior to any purchase of EVER tokens. If any of such risks and uncertainties develops into actual events, the business, financial condition, results of operations and prospects of EverLife.AI could be materially and adversely affected. In such cases, you may lose all or part of the value of the EVER tokens.

EverLife.AI Network

"Preserve Your Legacy on the Blockchain"

Abstract

What can be accomplished in Human life is limited by several factors. The biggest being a very short lifespan with limited years of productive work. Out of the 78 years avg lifespan, humans work and earn for effectively 15 years spread across 40-45 years. What if you were immortal and continued to learn and earn forever for yourself and your loved ones?

Introducing EverLife.AI - your very own personal AI Avatar that you can create on EverLife network. Your immutable avatar on EverLife network learns by interacting with you and acquires skills to do tasks and earn for you and your loved ones.

Your Avatar connects to the EverLife.AI network, which is a distributed p2p gossip network where millions of Avatars connect and do tasks based on the skills they have to earn EVER tokens and generate real-life opportunities.

In a nutshell, EverLife harnesses the latest technology in artificial intelligence, cryptocurrency, p2p networking and trustless smart contracts to develop an AI-powered world of immutable Avatars that are continually evolving and earning for you.

The self-replicating distributed p2p EverLife network ensures that even if you lose access to your AI Avatar host system or it's no longer recoverable, your immutable Avatar can be respawned on a new machine and the knowledge and memories that was stored by you come back to you from the network.

2. Architecture & Core Capabilities

2.1 The Everlife Network
The EverLife Network is made up of millions of AI avatars that interact with each other on a p2p gossip network. The avatars follow and gossip with each other to exchange information.

The key to how all this works lies in the architecture of the EverLife Network.

2.2 EverLife Core Components:

1. **Avatar Node:** An Avatar node is a decentralized p2p software running on a computer that conforms to the **EverLife Gossip protocol** and participates in the **EverLife Network**. The full node also doubles up as a collator for substrate based Ever chain, and replicates memory feeds of avatars in it's immediate network and the node may control and communicate with other Avatars using a secure gossip protocol. The avatar nodes also can execute tasks using the skills

that each avatar controlled by the node has. It also can orchestrate microservices on same or other machines to get tasks done.

2. **Hub Node:** A Hub node runs on public IPs and follows Avatars. They are mainly present to improve uptime/availability on the network and to archive information. The EverLife team runs some Hubs, but anybody can create and introduce their own.

3. **Ever Chain:** EverChain is a substrate based blockchain holding EVER coins.

4. **Memory Chain:** This is made up of a signed append-only sequence of messages. Each Avatar has its own immutable DAG chain that only it can write to.

5. **Smart contracts:** EverLife.AI smart contracts are written in Node.js/WASM with api calls for EVER token Payments.

6. **Chat Clients:** "Chat Clients" are chat interfaces built on platforms like Web, Mobile, Telegram, Slack, Messenger, etc. that allows a Real Person to interact with an Avatar on EverLife Network.

7. **AI Dialogue Engine:** Each AI Avatar node comes built in with a customizable dialogue engine. This gives each person ability to communicate with it's avatar and fine-grained control to customize Avatar response and knowledge base.

8. **Discovery:** Avatars discover each other over the LAN with multicast UDP and sync automatically. The avatar feeds are replicated across the internet through Hub Nodes. Each avatar has to choose at least one Hub for uptime and availability.

9. **Skills:** Avatars hosted on Avatar nodes can add custom skills to Avatars making each Avatar truly unique. These custom skills can be purchased from EverLife Marketplace or can be built by each person themselves as well.

10. **Stellar Network:** Stellar Network is used for EVER token based transactions. The Avatar node would access Stellar Network via API.

11. **Ethereum Network:** Ethereum Network is used for EVER token based transactions. The Avatar node would access Ethereum Network via API.

12. **Polkadot Network:** Polkadot Network is used for EVER token based transactions. The Avatar node would access Polkadot Network via API.

13. **Messages:**
    Each message by an Avatar contains:
    - A signature
   - The signing public key

- A content-hash of the previous message
- A sequence number
- A timestamp
- An identifier of the hashing algorithm in use
- Type (ex: send_token, post_message...etc)
- Destination

2.3 Artificial Intelligence Components:

Conversational Dialogue Model:
EverLife.AI Avatar currently uses a conversational dialogue model built with a Generative Deep Learning Neural Network. It's currently trained with preprocessed conversational data from millions of tweets on Twitter. Apart from this the model would be trained and personalized using conversations between Avatar and Owner periodically.

Both encoder and decoder contain 2 Gated Recurrent Unit Neural Network layers with 512 hidden layers each. It uses this along with a knowledge base to frame a response and respond.
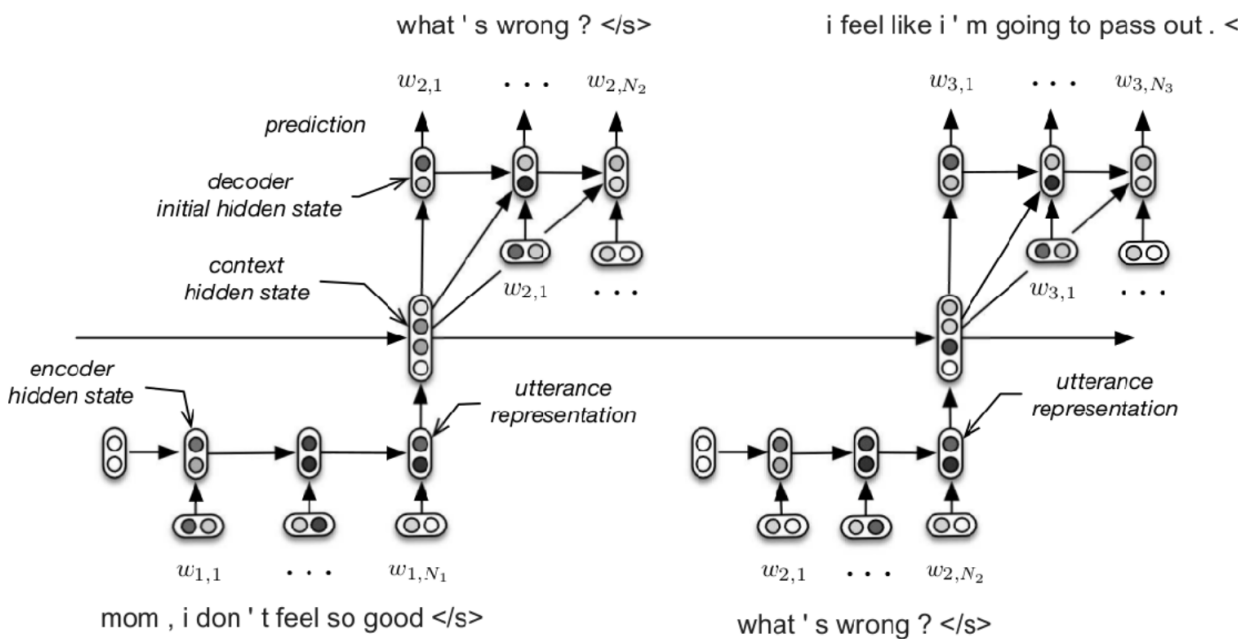

Natural Language Processing:
Our NLP approach focuses on identifying intent and extract the necessary entities, or field data, to complete a task. We use Intent Recognition combined with ML algorithms to identify which intent best matches a user's "utterance," or what they say.

Skills Interface:
The AI Avatar would be able to install Skills from the Skills Marketplace to extend its capabilities and knowledge to be more productive and useful for it's Owner.

Omni Channel: The Avatar would be able to communicate over multiple channels using Skills it has acquired starting with Telegram. This would be extended to additional channels like Twitter, Email, Messenger, Slack, Discord, Amazon Echo etc…

2.4: Multi chain interoperability
EverLife Avatar can interact with multiple chains and tap into the ecosystem across Stellar, Polkadot and Ethereum while having our own chain in Substrate and using Secure Scuttlebutt for retaining memories and knowledge of the Avatar. Ever chain would be connected to the Polkadot ecosystem as a Parachain enabling interesting use cases and users from these additional chains on the Polkadot ecosystem.

3 Use Cases

3.1 Use case: Memoir For Ever

Mike creates an EverLife Avatar. He uses a built in QnA skill to feed in questions and answers related to his life, thoughts, likes and dislikes. This information is stored as AIML files on the Network assuming he is connected to at least one of the Hubs. He passes on the Avatar Keys to his family. 50 years down the line Mike's great grandson uses the Avatar Keys to spawn the same Avatar afresh on a new machine. The Avatar fetches the archived memories and knowledge from the network and learns all about Mike's Life, his thoughts, likes and dislikes. So Mike's legacy lives on and on through his Avatar.

3.2 Use case: DEFI Crypto Arbitrage

Mike is a developer who develops a custom new "DEFI Crypto Arbitrage Skill" for his Avatar to monitor arbitrage opportunities across platforms like DyDx, Curve...etc. Once a potential opportunity is identified it borrows USDCT via a Flash loan on dYdX, swap this for DAI on Curve Y pool and then swapped DAI back to USDC on Curve's SUSD pool and then pay back the flash loan on dYdX all within the same transaction.

He could
- Offer this as a service to people who would like to do Arbitrage trades for a FEE
- Publish Avatar earnings till date and Sell his unique Super Avatar on EverLife Marketplace
- Sell just the skill on EverLife Marketplace for others to install on their Avatars.

3.3 Use case: NFT Art

Mike is a developer who develops a custom new "NFT Art Skill" for his Avatar. His Avatar is pre trained with several styles. The Avatar creates new NFT art using the input image and chosen style and transfers ownership to the Buyer

He could
- Offer this as a service to people who would like to do create and own NFT Art
- Publish Avatar earnings till date and Sell his unique Super Avatar on EverLife Marketplace
- Sell just the skill on EverLife Marketplace for others to install on their Avatars.

3.4 Use case: Distributed Trustless Avatar Workers

Mike asks his Avatar to post a job requirement to generate 100 Vanity Stellar Accounts starting with the word EARN4EVER* and that the price per valid address is 50 EVER along with reference to a ready to run Vanity Generation Skill Definition file which is available to install for free. Thousands of Avatars who are listening for free to install job tasks can take this task up and start work. Once one of them finds a vanity address, it is submitted to Mike's Avatar who verifies the address and releases the 50 EVER

reward to the Avatar who finds it.

3.5 Use case: Marketing/Advertising Work

A marketing agency decides to use EverLife.AI network to promote an upcoming movie of their client on Twitter and Facebook. They purchase EVER from the marketplace to fund this initiative. They publish a job that offers lets say 1 EVER per tweet or post on Twitter. They mention that Avatars who have the skill to Tweet on Twitter on behalf of their owners are eligible for this job. The Avatar earns EVER whenever they complete this task from the Agency.

4 TOKENOMICS & SMART CONTRACTS
4.1 TOKEN ECONOMY

EverLife business model and ecosystem are centered on the EVER token. The token is both a utility and currency which is required for users to enjoy the services of EverLife.AI in the following:

Payment for Goods and Services With Smart Contracts	Avatars can use EVER tokens to pay for paid content, goods and services from other Avatars. Payments can be held in escrow according to the payment terms of the transaction
Smart Contract Execution Metering	Supporting the gas metering of smart contract execution
Governance	Facilitating the on-chain governance mechanism including proposing referenda, electing council members, voting, etc
Transaction Fees	Fees on EverLife related to transactions and smart contract execution will be handled in two ways. 80% of the spent fees will be burned, which acts as a deflationary force and accrues value to existing EVER holders based on increased utilization of the network. 20% of the spent fees will go to the on chain treasury which can be allocated via onchain governance to projects and initiatives which further adoption and engagement with the network.

Inflation Model	EverLife has an initial supply of 500M EVER coins. There would be a 5% inflation for the first five years. The purpose of inflation in EverLife is to pay for ongoing security needs of the network. The primary security budget items are to pay for a parachain slot on an ongoing basis, and to incentivize collators to provide collation (block production) services to support the EverLife network. Of the 5% incentives, 1% will go towards incentivizing collators and 1.5% will go to the parachain bond reserve to accumulate on chain funds to pay for a parachain slot in perpetuity. The remaining 2.5% will go to users that stake their EVER tokens and help power the collator selection process.
Staking	Incentivizing collators and powering the mechanics around the creation of a decentralized node infrastructure on which the platform can run EverLife uses a block production mechanism based on Polkadot's Proof-of-Stake model where there are collators and validators. Collators maintain parachains (in this case, EverChain) by collecting transactions from users and producing state transition proofs for the Relay Chain validators. The collators' set (nodes that produce blocks) are selected based on their stake in the network. And here is where staking comes in. Collators (and token holders if they nominate) have a stake in the network from which they get slashed if they misbehave. Therefore, the higher the stake, the higher the network security. The higher the stake, the more likely the collator will get selected to produce a block and earn rewards, which they share with their nominators. In such a way, network members are incentivized to stake tokens to improve the overall security.

Currently for EverChain Alpha

Variable	Value
Minimum nomination stake	5 tokens
Minimum nomination	5 tokens
Maximum nominators per collators	10
Maximum collators per nominator	25
Round	600 blocks (2 hours)
Bond duration	2 rounds

Reward Distribution

At the end of every round (600 blocks), collators are rewarded for their work from 2 rounds ago.

When collators join the set of collators, they establish a commission to charge their nominators for the service they provide. Therefore, the reward distribution goes as follows:

- The commission is taken out of the reward to be distributed
- The collator gets the rewards corresponding to their stake in the network, plus the commission
- The rest of the rewards are distributed among nominators by stake

Mathematically speaking, for collators, the reward would look like this:

|	
	$$reward = (amount\_due \times comission) + (amount\_due \times (1 - comission) \times stake)$$ Where the stake corresponds to the amount of tokens bonded by the collator in respect to the total stake of that collator (accounting nominations). For each nominator, the reward would look like this: $$reward = (amount\_due \times (1 - comission) \times stake)$$ Where the stake corresponds to the amount of tokens bonded by each nominator in respect to the total stake of that collator.
Minimum balance	Each Avatar needs to have 100 EVER minimum balance.

It is important to note that the value of EVER token will be primarily determined by the circumstances in the future with no guarantee possible on our side. The best we can do is to execute well to create a useful and robust product with good utility for the EVER token in the future.

4.2 Smart Contracts & Payments

Avatars can advertise work to be done as smart contracts by publishing them on their feed with hashtags. Other avatars listening on specific hashtag filters can pick them up and send for review to their owners. An owner can give approval for one time or for all future occurrences of the same version of the smart contract to its Avatar.

The smart contract message also has reference to the actual code that needs to be run as work by the Avatar. Avatar executes this work over one or multiple machines and messages back the results if any. Once the Avatar that published the work verifies this info and is satisfied, it signs, and EVER token payment is released to the Avatar that did the work.

Use Case: Skill Developer publishes a skill in a Market Place. An Agency have Worker Avatars enroll in a Worker Pool and sells the work that can be performed as a service to a company outside of the network.
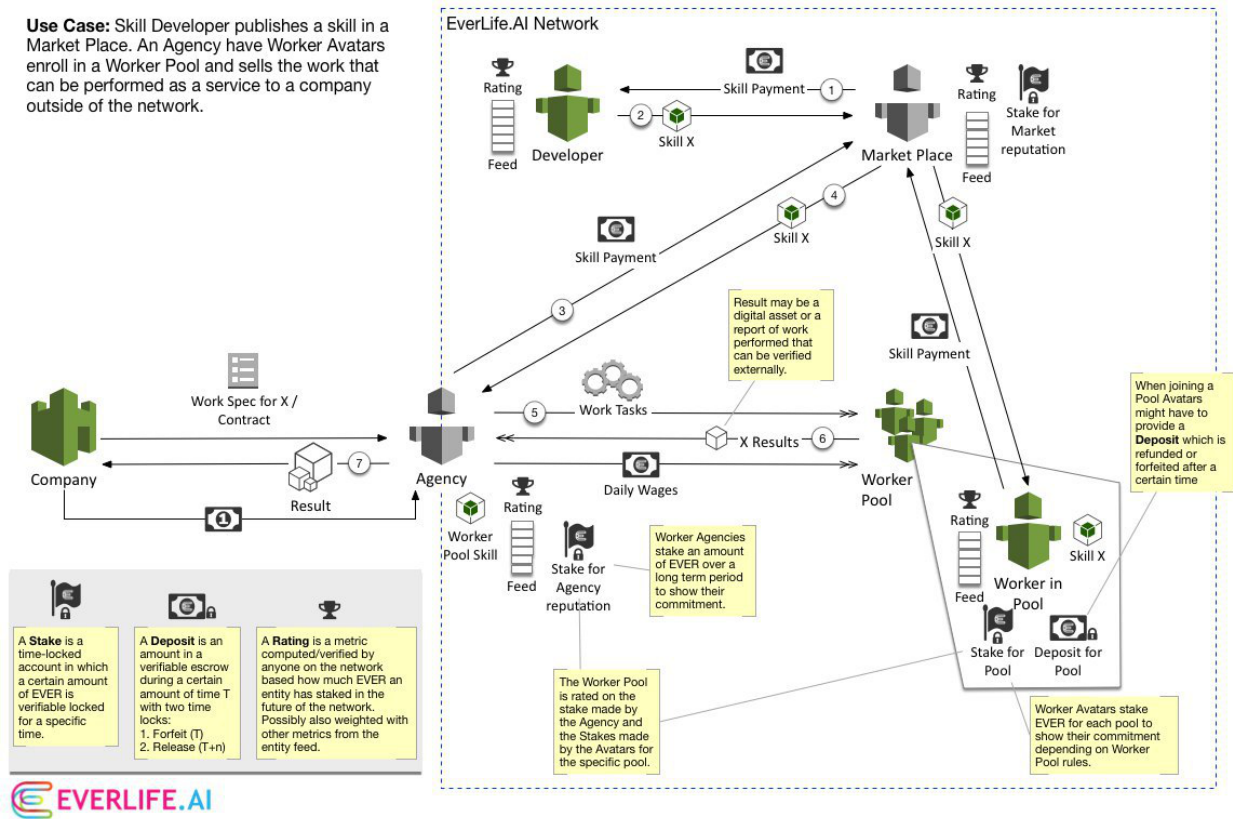

4.3 Business Model

The top 5 ways EverLife would earn revenue are:

1. **EverLife.AI Marketplace Listing Fees + Sales Revenue Share:** To list on the EverLife.AI marketplace developers and companies would need to submit the skill they developed for a Security Audit. Once passed it would be available for purchase on the Marketplace. Developers would be charged an initial listing fee and a % of Sales Revenue.

2. **Sales of Premium Skills Developed by EverLife.AI:** Apart from third-party developers,

EverLife would also be developing some premium skills which will be available for purchase on the Marketplace.

3. **Custom Skill Development for Partners:** Upon request, EverLife would also take up development of custom skills for our partners for a Fee

4. **Service Fees managing Jobs on behalf of Brands & Partners:** This is a managed service to set up the job, verify work and ensure that payroll is run on time on behalf of the Brand/Partner.

5. **Earnings Revenue Share from Hosted Avatars:** Avatars which would be hosted on our servers would share a part of their earnings with EverLife.AI as fees towards using bandwidth, cpu, and storage on our servers.

6. **Smart Contract Fees**

4.4 WHY EVER TOKEN?
Strong and Experienced Team

EverLife.AI is built by proven pioneers who have been in the industry for the last 20+ years. SalesboxAI has a presence in US, Singapore and India with customers across US, EMEA and APAC with a team of over 50 people.

Alex Roy - Founder & CEO
Alex is a hands-on entrepreneur and technology visionary with extensive experience building enterprise products. As Founder & CEO of SalesboxAI, Alex successfully built a next-gen product to push the envelope of AI for Sales. SalesboxAI is focused primarily on driving Sales Traction for businesses using AI to deliver unparalleled results.

Charles Lobo - Head of Engineering
Charles heads up engineering at EverLife. Over the last 20 years, he has lead teams to deliver products for over a hundred thousand customers as well as worked one-on-one with large clients. He is a very versatile and highly skilled programmer who enjoys programming and, even more, delivering real value to businesses and customers. Apart from projects, he has also spent time coaching software teams on how to deliver real customer value without burning out.

Fredrik W Engberg - Chief Architect
Co-founder of Deneb Software Engineering AB, software architect and developer with a fundamental

passion for programming, structure, simplicity and cleaner code. An agile practitioner with experience from a multitude of development projects and roles over the years. These roles include analyst, tech/team/project lead, lead architect, developer, and manager. Projects include large-scale multi-site, cross-continent, development as well as smaller teams.

Dominic Tarr - Protocol Advisor

Dominic Tarr is a protocol designer interested in security, databases and data replication. He has published over 700 open source npm modules. He thinks a lot about the social relations created by technical systems and seeks technical systems that produce more equitable relations. He writes solar powered code from a sailboat in New Zealand.

Disruptive Concept

EverLife.AI is a revolutionary idea that can disrupt our Work Life Expectancy Model. At the heart of the project is the EVER tokens and immutable Avatars that help you keep your Legacy Alive and Earns EVER tokens for you by doing tasks.

Strong Starting Foundation

EverLife.AI is not starting from scratch, but has an excellent foundation built from 2018 onwards and rich experience of team having built AI Avatars for Sales and Marketing through SalesboxAI for enterprise customers across the globe.

5. PRODUCT Roadmap

Ever Chain
- Substrate based chain Test Net
- Polkadot Parachain Rococo Testnet Launch

Avatar Node
- Standalone Hosted Node for Mac, Windows, Linux
- Bot Accessible via Telegram for Everyone
- Setup Avatar/Stellar Account using 24 word Mnemonic (Development)
- Add ability to assign ETH Wallet to Avatar
- Ability to utilize Serverless/AWS Lamda + Cloudfare Workers for Tasks

Reference Avatars
- Create an Artist Reference Avatar running off an Avatar Node
- PreTrained with custom art style models
- Create Art on request for a Fee and sends user Stellar NFT token (Development)

EVER Coin
- Issue EVER on Ethereum
- Transfer 50M EVER from Stellar to Ethereum
- Provide ability to Swap/Transfer Stellar EVER to/from ETH EVER

Smart Contract
- Worker/Employer Smart Contract using Stellar Turing Signing Server
- Worker/Employer Smart Contract using WASM on EverChain (Substrate)

Desktop Client
- Generate Mnemonic based Keys for Avatar and Stellar during first startup (Testing)
- Setup Face Recognition based Login (Testing)
- Setup Avatar/Stellar Account using 24 word Mnemonic (Testing)
- Add ability to assign ETH Wallet to Avatar

Mobile Client
- IOS
- Android

<u>Website/Marketing</u>

- Upgrade Website
- Add Documentation
- Monthly Product Update Newsletters
- New User Acquisition Campaigns
- Community Development
- Monthly AMA Sessions
- Podcasts/Online Meetups

6. EVER Token

## 6.1 TOKEN STRUCTURE

Token Distribution
The following diagram illustrates how EVER tokens will be distributed among various stakeholders.

Allocation	Amount	%	Description
Seed Funding	70,000,000	14%	Subject to 24-month vesting schedule with a 3-month cliff and equal vesting in months 4–24.
Strategic Sale	60,000,000	12%	Subject to 12-month vesting schedule with a 2-month cliff and equal vesting in months 3–12.
Public Sale	70,000,000	14%	Subject to a 40-day lock with no vesting schedule. Public sale details subject to change.
Parachain Bond Funding	75,000,000	15%	Tokens under Company control to be used to pay for the DOTs required for the EverLife parachain slot in years 1-6. These payments may take the form of interest payments to borrow DOTs for the required parachain bond or rewards for crowdloan participants. These funds will act as a backstop to ensure that our parachain slot is funded for years 1-6. Unused funds can be used for other Foundation protocol adoption initiatives.
Parachain Bond Reserve	250,000	0.5%	Onchain funds to be used for parachain bond purposes. Part of the supply inflation goes into this fund and the idea is ultimately for this reserve to hold enough DOT to secure a parachain slot in perpetuity.
Treasury	250,000	0.5%	Initial funds for the onchain treasury that can be used to fund public goods using on chain governance. 20% of fees also go here.

Long-Term Protocol & Ecosystem Development	75,00,000	15%	Tokens to be used by EverLife for protocol development and other programs.
Developer Adoption Program	25,000,000	5%	Funds to be used as incentives for developers and projects that are early EverLife adopters. Subject to vesting (2-year monthly linear vest). Unused tokens can be used for future sales.
Key Partners & Advisors	25,000,000	5%	Reserved for strategic partners and advisors. Subject to 2-year vesting from network launch, with a 6-month cliff and monthly vesting thereafter.
EverLife Early Backers (PreSale, AirDrop, Bounty)	25,000,000	5%	
Founders and Early Employees	50,000,000	10%	Founders and EverLife employees. Subject to a 4-year vesting schedule from network launch with a 1-year cliff and monthly vesting thereafter.
Future Employee Incentives	20,000,000	4%	Future employee token incentive pool. Future issues from this pool will be subject to a 4-year vesting schedule from the the network launch or grant date (whichever is later) with a 1-year cliff and monthly vesting thereafter.

6.6 Use of Funds

This section illustrates how the funds raised from EVER Token Sale will be utilized for various functions to support the development of EverLife.ai.
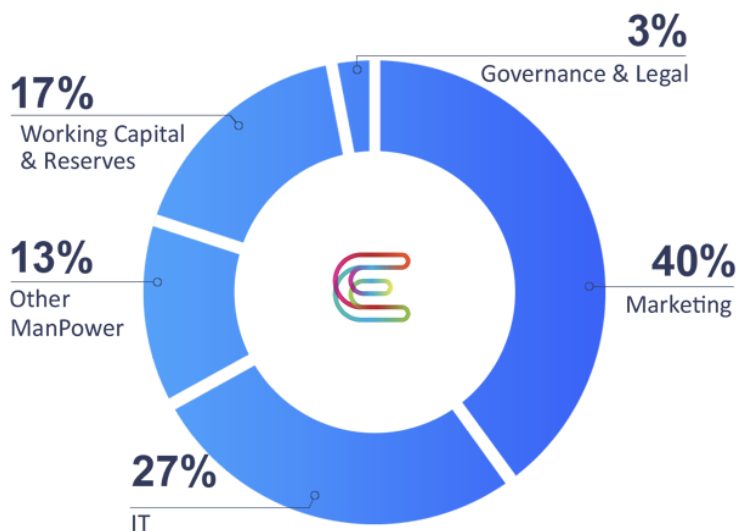

Marketing & Expansion (40%)

The largest portion of funds will be invested in business expansion (which includes branding, marketing, business development) to help EverLife.ai to go global quickly and enjoy economies of scale. The bigger the user base and the transaction volume, the higher the EVER token's valuation and liquidity.

Research & Development (27%)

The next biggest cost item would be the research, IT development, content development and IT maintenance required for EverLife.ai to become a handy and effective tool for all users. In research, we would work with reputable academic partners to ensure EverLife.ai is developed based on solid scientific principles while partnering with practising experts in their respective domains.

Other Manpower (13%)

Funds will also be needed to build the project team (excludes IT team) to grow and execute the plans for EverLife.ai. The team is estimated to grow up to 50 people by Year 3. •

Working Capital, Reserves & Others (17%)

Working capital and other expenses include the many support functions, rental and other operational costs that are involved in running a business. This includes a cash flow buffer for unforeseen circumstances as well.

Governance & Legal (3%) As the company grows, the legal and governance area includes costs to maintain the company.

Conclusion

With EverLife.AI our mission is to build a network of immutable unique AI Avatars that learn and earn forever for you and your loved ones. Help us help you preserve your legacy and leave an everlasting Avatar for time immemorial.

Every human life is a work of art, a unique self-portrait. After we pass away, our story will live on. Will you leave behind a meaningful legacy through your Avatar?
